Patient: Ramesh Kumar | Age: 68 | Sex: Male | Blood group: B+

Patient ID: pat-1 | Phone: +91 89040 30441 | Preferred language: Hindi

Treating doctor: Dr. Aisha Rao (Cardiology)

Diagnoses

- Essential hypertension (since 2019), currently BP 150/95
- Type 2 diabetes mellitus, HbA1c 7.8%
- Hyperlipidemia (raised LDL cholesterol)

Current Medications

- Amlodipine 5 mg - once daily, morning after breakfast (blood pressure)
- Atorvastatin 10 mg - once at night after dinner (cholesterol)
- Metformin 500 mg - twice daily, after breakfast and dinner (blood sugar)

Allergies

- Penicillin (rash)

Diet & Lifestyle Advice

- Low-salt DASH diet; avoid pickles, papad, fried and processed food
- Diabetic diet: avoid sugar, sweets, excess white rice; prefer millets and vegetables
- Walk 30 minutes daily; sleep 7-8 hours; monitor BP at home

Warning Signs (seek emergency care)

- Chest pain, breathlessness, severe headache, sudden weakness or slurred speech

Follow-up

- Review in 2 weeks with home BP readings and fasting blood sugar report
